

Public Relations Toolkit

2016

THE NATIONAL 9-1-1 EDUCATION COALITION

About the Toolkit

This Public Relations Toolkit was developed by the National 9-1-1 Education Coalition to accompany the *9-1-1: The Number to Know*™ national awareness campaign. The campaign was developed for use by national organizations, state 9-1-1 entities, regional authorities and PSAPs during National 9-1-1 Education Month and National Public Safety Telecommunicators Week, both in April. It is also designed to support the coordinated promotion of 9-1-1 education and awareness year-round.

The National 9-1-1 Education Coalition hopes this toolkit will provide you with useful information and ideas about how to celebrate and promote April as National 9-1-1 Education Month and National Public Safety Telecommunicators Week. Additionally, a variety of campaign materials and templates have also been developed and are available for you to download at www.know911.org.

About the National 9-1-1 Education Coalition

In October 2010, a volunteer group of public safety, education and industry stakeholders formed the National 9-1-1 Education Coalition (the Coalition) to support the nationwide coordinated promotion of National 9-1-1 Education Month and National Public Safety Telecommunicators Week. The Coalition leveraged the resources and expertise of its members to create the 9-1-1: The Number to Know awareness campaign to promote a common message of public awareness on the effective use of 9-1-1 resources.

The Coalition also supports access to the “best of the best” 9-1-1 educational and promotional ideas, and fosters the advancement of 9-1-1

technology and services to meet the evolving needs of the public to access emergency help.

Members of the Coalition include:

- NG9-1-1 Institute
- 9-1-1 for Kids®
- Association of Public Safety Communications Officials (APCO)
- CTIA®
- The Industry Council for Emergency Response Technologies
- National Academies of Emergency Dispatch (NAED)
- National Association of State 9-1-1 Administrators (NASNA)
- National Emergency Number Association (NENA)

For more information about the Coalition, please contact the National 911 Education Coalition at know911org@gmail.com.

History of 9-1-1

The three-digit telephone number "9-1-1" has been designated as the "Universal Emergency Number," for citizens throughout the United States to request emergency assistance. It is intended as a nationwide telephone number and gives the public fast and easy access to a Public Safety Answering Point (PSAP).

In the United States, the first catalyst for a nationwide emergency telephone number was in 1957, when the National Association of Fire Chiefs recommended use of a single number for reporting fires.

In 1967, the President's Commission on Law Enforcement and Administration of Justice recommended that a "single number should be established" nationwide for reporting emergency situations. The use of different telephone numbers for each type of emergency was determined to be contrary to the purpose of a single, universal number.

Other Federal Government Agencies and various governmental officials also supported and encouraged the recommendation. As a result of the immense interest in this issue, the President's Commission on Civil Disorders turned to the Federal Communications Commission (FCC) for a solution.

In November 1967, the FCC met with the American Telephone and Telegraph Company (AT&T) to find a means of establishing a universal emergency number that could be implemented quickly. In 1968, AT&T announced that it would establish the digits 9-1-1 (nine-one-one) as the emergency code throughout the United States.

The code 9-1-1 was chosen because it best fit the needs of all parties involved. First, and most important, it met public requirements because it is brief, easily remembered, and can be dialed quickly. Second, because it is a unique number, never having been authorized as an office code, area code, or service code, it best met the long range numbering plans and switching configurations of the telephone industry.

Congress backed AT&T's proposal and passed legislation allowing use of only the numbers

9-1-1 when creating a single emergency calling service, thereby making 9-1-1 a standard emergency number nationwide. A Bell System policy was established to absorb the cost of central office modifications and any additions necessary to accommodate the 9-1-1 code as part of the general rate base.

With Enhanced 9-1-1, or E9-1-1, local PSAPs are responsible for paying network trunking costs according to tariffed rates, and for purchasing telephone answering equipment from the vendor of their choice.

On February 16, 1968, Senator Rankin Fite completed the first 9-1-1 call made in the United States in Haleyville, Alabama. The serving telephone company was then Alabama Telephone Company. This Haleyville 9-1-1 system is still in operation today.

On February 22, 1968, Nome, Alaska implemented 9-1-1 service.

In March 1973, the White House's Office of Telecommunications issued a national policy statement which recognized the benefits of 9-1-1, encouraged the nationwide adoption of 9-1-1, and provided for the establishment of a Federal Information Center to assist units of government in planning and implementation.

The intense interest in the concept of 9-1-1 can be attributed primarily to the recognition of characteristics of modern society, i.e., increased incidences of crimes, accidents, and medical emergencies, inadequacy of existing emergency reporting methods, and the continued growth and mobility of the population.

In the early 1970s, AT&T began the development of sophisticated features for the 9-1-1 with a pilot program in Alameda County, California. The feature was "selective call routing." This pilot program supported the theory behind the Executive Office of Telecommunication's Policy.

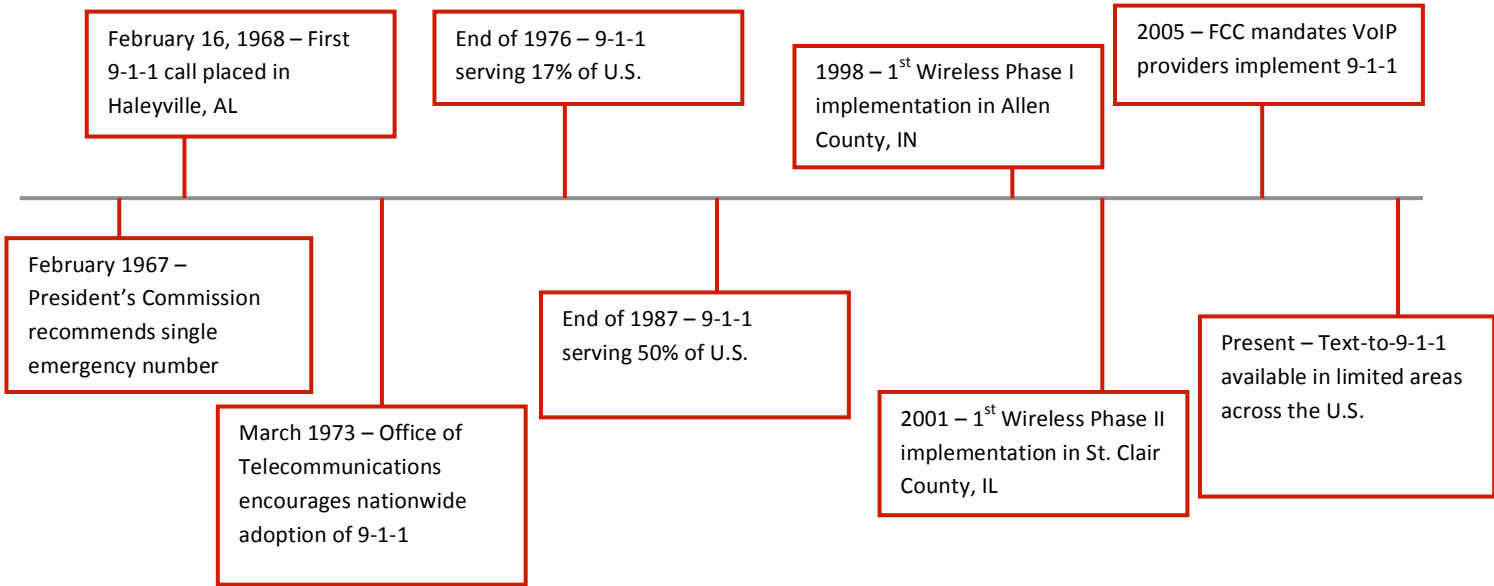

By the end of 1976, 9-1-1 was serving about 17% of the population of the United States. In 1979, approximately 26% of the population of the United States had 9-1-1 service, and nine states had enacted 9-1-1 legislation. At this time, 9-1-1 service was growing at the rate of 70 new systems per year. By 1987, those figures had grown to indicate that 50% of the US population had access to 9-1-1 emergency service numbers.

In addition, Canada recognized the advantages of a single emergency number and chose to adopt 9-1-1 rather than use a different means of emergency reporting service, thus unifying the concept and giving 9-1-1 international stature.

At the end of the 20th century, nearly 93% of the population of the United States was covered by some type of 9-1-1 service. Ninety-five percent of that coverage was Enhanced 9-1-1. Approximately 96% of the geographic US is covered by some type of 9-1-1.

(History provided by NENA.org)

History of 9-1-1 Timeline

History of National 9-1-1 Education Month

In 2008, the United States Congress recognized April as National 9-1-1 Education Month, supporting the initiative of the National 9-1-1 Education Coalition, an alliance of 8 national organizations dedicated to advancing public safety communications who have joined together to advance 9-1-1 education. These organizations included the NG9-1-1 Institute (formerly the E9-1-1 Institute), the National Emergency Number Association (NENA), 9-1-1 for Kids, the National Association for State 9-1-1 Administrators (NASNA), the Association of Public Safety Officials (APCO), CTIA – The Wireless Association, the Industry Council for Emergency Response Technologies (iCERT, formerly the 9-1-1 Industry Alliance) and the National Academies of Emergency Dispatch (NAED).

Each year, the National Coalition for 9-1-1 Education calls upon public safety officials, schools, government officials and industry leaders to engage in a national effort to educate children, seniors and the general public about the importance and appropriate use of 9-1-1. During the month of April, these organizations conduct special outreach to build on existing state and local 9-1-1 education efforts in an attempt to raise the issue of 9-1-1 education to a national level.

National 9-1-1 Education Coalition

VISION: National 9-1-1 Education Coalition

The VISION of the National 9-1-1 Education Coalition is to save lives and improve emergency response by creating a national 9-1-1 education and awareness effort to ensure the appropriate and responsible use of 9-1-1 resources and embraces contemporary communications opportunities.

MISSION: National 9-1-1 Education Coalition

The MISSION of the Coalition for 9-1-1 Education is to leverage the resources of public safety, educational, and industry stakeholders to create a national, coordinated campaign with a common message of public awareness on the appropriate and responsible use of 9-1-1 resources. The Coalition will encourage a nation-wide effort to celebrate "National 9-1-1 Education Month" and "National Public Safety Telecommunications Week" as key events to promote education and awareness as well as provide support for ongoing access to the "best of the best" 9-1-1 education content and promotion ideas and foster the migration to contemporary communications devices that are increasingly mobile and multi-media driven.

Congressional Resolution

Congress first endorsed April as National 9-1-1 Education Month in March 2010. The Congressional NextGen 9-1-1 Caucus Co-Chairs Reps. Anna Eshoo (D-CA) and John Shimkus (R-IL) and 56 House co-sponsors sponsored H-Res. 537 to establish April as National 9-1-1 Education Month and enable Congress to support a national effort by the National 9-1-1 Education Coalition dedicated to advancing public safety. In April of 2010 the United States Senate passed S. Res. 468 recognizing April as “National 9-1-1 Education Month.” The Measure was co-sponsored by the NextGen 9-1-1 Caucus Co-Chairs Amy Klobuchar (D-MN) and Senator Richard Burr (R-NC) in support of the Coalition’s efforts and urging the public to observe the month with appropriate ceremonies, training activities and education efforts.

110TH CONGRESS
1ST SESSION

H. RES. 537

Expressing support for the designation and goals of “National 9-1-1 Education Month”, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

Ms. ESHOO (for herself, Mr. SHIMKUS, and [see ATTACHED LIST of cosponsors]) submitted the following resolution; which was referred to the Committee on _____

RESOLUTION

Expressing support for the designation and goals of “National 9-1-1 Education Month”, and for other purposes.

Whereas 9-1-1 is nationally recognized as the number to call in an emergency to receive immediate help from police, fire, emergency medical services, or other appropriate emergency response entities;

110TH CONGRESS
2D SESSION

S. RES. 468

Designating April 2008 as “National 9-1-1 Education Month”.

IN THE SENATE OF THE UNITED STATES

MARCH 3, 2008

Mrs. CLINTON (for herself and Mr. STEVENS) submitted the following resolution; which was referred to the Committee on the Judiciary

APRIL 3, 2008

Reported by Mr. LEAHY, without amendment

2016 Proclamation

PROCLAMATION

National 9-1-1 Education Month April 2016

WHEREAS, 9-1-1 is nationally recognized as the number to call in an emergency to receive immediate help from police, fire, emergency medical services, or other appropriate emergency response entities; and

WHEREAS, 9-1-1 was designated by Congress as the national emergency call number under the Wireless Communications and Public Safety Act of 1999 (Public Law 106-81); and

WHEREAS, the ENHANCE 911 Act of 2004 (Public Law 108-494) established enhanced 9-1-1 as a high national priority as part of our Nation's homeland security and public safety; and

WHEREAS, people of all ages use 9-1-1, and it is critical to educate the public of all ages on the proper use of 9-1-1; and

WHEREAS, a growing segment of the population, including the deaf, hard of hearing, deaf-blind, and individuals with speech disabilities increasingly communicate with nontraditional text, video and instant messaging communications services and anticipate that these services will be able to connect directly to 9-1-1; and

WHEREAS, thousands of 9-1-1 calls are made every year by children properly trained on the use of 9-1-1, resulting in lives saved which underscores the critical importance of training children early in life about 9-1-1; and

WHEREAS, there is widespread misuse of the 9-1-1 system, including prank and non-emergency calls, which can result in costly and inefficient use of 9-1-1 and emergency response resources.

NOW, therefore, I, [First/Last Name], Mayor of [City/County], do hereby proclaim April 2013 as National 9-1-1 Education Month. I call upon all government officials, parents, teachers, school administrators, caregivers, businesses leaders, non-profit organizations, and the people of the United States to observe this month with training, events, and activities to educate the public on 9-1-1 and its services.

Dated this ____ day of April, 2016

[First/Last Name], Mayor

Attest:

[First/Last Name], Clerk
(Attachment 3)

National Public Safety Telecommunicators Week (April 10-16, 2016)

Celebrate National Public Safety Telecommunicators Week (NPSTW) the **second full week of April - April 10-16, 2016**. NPSTW is celebrated annually and honors the thousands of men and women who respond to emergency calls, dispatch emergency professionals and equipment, and render life saving assistance to the citizens of the United States.

It was first conceived by Patricia Anderson of the Contra Costa County (Calif.) Sheriff's Office in 1981 and was observed only at that agency for three years. Members of the Virginia and North Carolina chapters of the Association of Public-Safety Communications Officials (APCO) became involved in the mid-1980s. By the early 1990s, the national APCO organization convinced Congress of the need for a formal proclamation. Rep. Edward J. Markey (D-Mass.) introduced what became H.J. Res. 284 to create "National Public Safety Telecommunicator Week." According to Congressional procedure, it was introduced twice more in 1993 and 1994, and then became permanent, without the need for yearly introduction.

The official name of the week when originally introduced in Congress in 1991 was "National Public Safety Telecommunicators Week." In the intervening years, it has become known by several other names, including "National Public-Safety Telecommunications Week" and "International Public Safety Telecommunicator's Week." The Congressional resolution also stated there were more than "500,000 telecommunications specialists," although other estimates put the number of dispatchers at just over 200,000. The Congressional figure may include support personnel and perhaps even those in the commercial sector of public safety communications.

Of course, you don't need NPSTW to honor your public safety dispatchers for excellence! You can write them a commendation, mention their "good job" at a shift briefing, or just give them a pat on the back.

HISTORY NPSTW ~ 1991

NATIONAL PUBLIC SAFETY TELECOMMUNICATORS WEEK (House of Representatives - October 09, 1991)

The Clerk read the joint resolution, as follows:

H.J. Res. 284

Whereas over one-half million dedicated men and women are engaged in the operation of emergency response systems for Federal, State, and local governmental entities throughout the United States;

Whereas these individuals are responsible for responding to the telephone calls of the general public for police, fire, and emergency medical assistance and for dispatching said assistance to help save the lives and property of our citizens;

Whereas such calls include not only police, fire, and emergency medical service calls but those governmental communications related to forestry and conservation operations, highway safety and maintenance activities, and all of the other operations which the modern governmental agency must conduct; and

Whereas America's public safety telecommunicators daily serve the public in countless ways without due recognition by the beneficiaries of their services: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the second week in April is hereby designated as 'National Public Safety Telecommunicators Week' . The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. SAWYER

Mr. SAWYER. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. **Sawyer**: Strike all after the resolving clause and insert the following:

That the week beginning April 12, 1992, is designated as 'National Public Safety Telecommunicators Week' , and the President is authorized and requested to issue a proclamation calling on the people of the United States to observe the week with appropriate ceremonies and activities.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Ohio [Mr. **Sawyer**].

The amendment in the nature of a substitute was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. SAWYER

Mr. SAWYER. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. **Sawyer**: Amend the title so as to read: `To designate the week beginning April 12, 1992, as `National Public Safety Telecommunicators Week'`.

The title amendment was agreed to.

A motion to reconsider was laid on the table.

Ideas to Celebrate & Observe National 9-1-1 Education Month

Host a 9-1-1 Education Kick-Off with a local school

- Hold an assembly to instruct children on how to use 9-1-1 and the appropriate use of 9-1-1
- Invite children to interact with Public Safety Officials
- Invite a local school to a PSAP visit
- Hold games and activities

Host a News Conference

- Highlight 9-1-1 Education
- Recognize local 9-1-1 Heroes
- Highlight National Public Safety Telecommunications Week the second week of April

Host a PSAP Open House

- Provide the community a closer look at the Public Safety System and the people on the receiving end of the 9-1-1 call

Recognize Public Safety Dispatchers

- Host a joint celebration of 9-1-1 Education Month and National Public Safety Telecommunications Week the second week of April

Inform the Public

- Place an information booth in a high traffic location such as a Government Building, Town Hall or at a local event - could be a manned or unmanned booth
- Provide collateral and information
- Use County and Public Access channels to notify the public of the booth and available information

News Conference Planning Guidelines

PRELIMINARY ACTIONS

- Determine location, time and date
- Notify local media of conference location and time
- Identify and Confirm Space
- Identify and Confirm Speakers
- Produce Media Kit or other necessary information
- Arrange for Video and/or audio taping
- Make follow up calls to media
- Arrange reception area for Media
- Brief your staff on the subject, spokesperson and the schedule

STATEMENTS AND NEWS RELEASES

- Obtain written statements from the spokesperson
- Make copies of the news release available to Media
- Develop anticipated questions and answers for the spokesperson
- Assemble Press Kits that include background information

NEWS CONFERENCE

- Prepare media kits for handout
- Record the names and contact information for media member attendance
- Monitor the time and pace of the conference closely
- Prepare Conference Notes

CONFERENCE FOLLOW-UP

- Send thank you to VIP's
- Send pictures of the news conference to local media
- Monitor media for news conference coverage

Sample News Release

Note to sender: please remove from document before distribution:

** This release announces April as 9-1-1 Education Month and should be sent anytime between March 15th and April 30th, 2016*

** This release is available for PSAPs to distribute to local news media*

** Please include appropriate spokesperson name and title to provide attribution to the generic quotes included below*

National 9-1-1 Education Month Prepares Americans for Emergencies

[City, State] – This April 1 - 30, national public safety organizations and the wireless industry will conduct outreach to the community to ensure the public is ready to access help during emergencies during National 9-1-1 Education Month.

The National 9-1-1 Education Coalition, an alliance of organizations committed to collecting and promoting 9-1-1 public education resources, has created a clearinghouse for free 9-1-1 public education materials, available now at www.know911.org. A variety of resources are available to support both the “9-1-1: The Number to Know” campaign and education themes including:

Call If You Can, Text If You Can’t: Text-to-9-1-1 service is available in an increasing number of communities around the country. The service benefits individuals (or persons) who are deaf, hard-of hearing or in a situation where they cannot speak and make a voice call. However, a traditional voice call, if possible, is still the best way to reach emergency services.

Know Your Location: Wireless calls to 9-1-1 provide location information, but 9-1-1 call takers may need more specific information. Be prepared to provide detailed information on where you are so that help can get to you as quickly as possible.

Stay Calm and Don’t Hang Up: Until you are instructed to do otherwise, stay on the line so you can provide any necessary information or assistance to the 9-1-1 call taker. Even if you accidentally call

9-1-1, don't hang up. Inform the call taker that you dialed accidentally and that there is no emergency.

"For nearly five decades, 9-1-1 has served as the vital link between the American public and emergency services. Public education and awareness initiatives have contributed in large measure to this incredible success," said _____, _____. "The resources available at www.know911.org help educators, government officials, media representatives, and concerned citizens alike promote ongoing, age-appropriate 9-1-1 education that can save lives."

"You don't wake up in the morning thinking you are going to call 9-1-1. However, should you have to, it may be the most important call you ever make," said _____, _____. "That's what makes 9-1-1 Education Month so very important. In an emergency, seconds matter; being knowledgeable and prepared can make all the difference."

The vision of the National 9-1-1 Education Coalition is to save lives and improve emergency response by creating a national 9-1-1 education and awareness effort to ensure the appropriate and responsible use of 9-1-1 resources and embraces contemporary communications opportunities. Its members include the Association of Public-Safety Communications Officials (APCO); CTIA®; the Industry Council for Emergency Response Technologies (iCERT), the NG9-1-1 Institute; the International Academies of Emergency Dispatch (IAED); the National Association of State 9-1-1 Administrators (NASNA); the National Emergency Number Association (NENA); and 9-1-1 For Kids.

Sample Talking Points for News Interviews

Developing Talking Points:

Creating A Road Map for Your Media Interview

Once a media interview is secured, the key campaign messages (the most important information you want the viewer to recall after the interview) should be reviewed, and talking points developed to help your 911 representative incorporate that important information into the interview.

A variety of sample key messages can be found at know911.org/message-guidelines. For example, sample key messages for a “9-1-1: The Number to Know” campaign theme might include:

- **Call If You Can, Text If You Can’t:** Text-to-9-1-1 service is available in an increasing number of communities around the country. The service benefits individuals (or persons) who are deaf, hard-of hearing or in a situation where they cannot speak and make a voice call. However, a traditional voice call, if possible, is still the best way to reach emergency services.
- **Know Your Location:** Wireless calls to 9-1-1 provide location information, but 9-1-1 call takers may need more specific information. Be prepared to provide detailed information on where you are so that help can get to you as quickly as possible.
- **Stay Calm and Don’t Hang Up:** Until you are instructed to do otherwise, stay on the line so you can provide any necessary information or assistance to the 9-1-1 call taker. Even if you accidentally call 9-1-1, don’t hang up. Inform the call taker that you dialed accidentally and that there is no emergency.

Talking points should make these three main points more “real” by including information specific to your community, anecdotes, success stories, and conversational phrases the interviewee can include.

The reporter or editor will either be open to suggestions about a location and

interview opportunities, or will already have suggestions about how they would like to build the segment. Incorporating people who have successfully used 911 to help save a life (their own or others) is an additional way to communicate a good outcome and bring the campaign messages “to life,” helping you and the reporter create an interesting story for the viewer.

Talking points should:

- Be brief. Most broadcast media interviews happen very quickly
- Be conversational. Talking points should not be read verbatim, but should be personalized by the 9-1-1 representative participating in the interview
- Be limited in quantity and prioritized. Again, broadcast interviews happen very quickly, so an interviewee shouldn’t expect to have the opportunity to communicate more than three to five messages in an interview.
- Incorporate the opportunity to “bridge” back to the key message. Reporters often take the interview away from the desired key messages. This is most often done without intent or malice, but good talking points and some pre-interview practice should help the interviewee take control of the segment and communicate those key messages, no matter that question the reporter asks.
 - For example – A reporter asks about the specific technology involved in your 9-1-1 systems. Pre-interview talking points can include a few suggestions such as:
 - “That’s a great question. We have very modern technology which allows us to help the people who call, however, even the best technology available to us right now can’t tell us exactly where a caller is, which is why we rely on the caller to be sure they provide exact information about their location so the police, fire or EMS team can find and help them.”

Logo Files for Printed Material

The National 9-1-1 Education Coalition and the Know911 Campaign encourage organizations to use the campaign logo and tagline as an anchor to your own materials, not as the main focal point. Suggested placement is at the bottom of your piece, next to your own organizations' logo(s). The campaign logo can be used in printed pieces and ads, in PowerPoint slide presentations, in television ads, on videos, websites, and on t-shirts or other promotional items. You are limited only by your imagination.

The Campaign logo and tagline are the intellectual property of the National 9-1-1 Education Coalition; however, it is made available for use by 9-1-1 organizations, PSAPs, educators and anyone who promotes 9-1-1. We only ask that you do not alter the logo and follow the logo usage guidelines (see the Campaign Guide in the Resources section of this website). Use by commercial organizations requires prior written approval from the National 9-1-1 Education Coalition (call 202-292-4603 for partnership information).

The campaign logo and tagline are yours to use; however, we would love to see what you do with it. In the future we may share best practice examples of ways materials have been used to support local outreach efforts, but you don't need to have anything approved.

Please visit www.know911.org for more information regarding the logo. More information can be found in the Frequently Asked Questions section of the website as well as the Campaign Guide in the Downloadable Resources section of the website.

Collateral - Materials

Resources - Fact Sheets

The National 9-1-1 Education Coalition: www.know911.org

The 9-1-1 Number to Know Campaign has free downloadable resources including graphics files, templates, educational materials, signage, web banners and more.

The Association of Public-Safety Communications Officials (APCO) International:
www.apcointl.org

APCO Internationals' [website](#) contains information for the public regarding location, wireless phone calls to 9-1-1, and information that is needed by the 9-1-1 center. Other resources include Project Locate and standards for handling of calls involving missing and exploited children. These and other APCO American National Standards can be accessed under the heading 9-1-1 resources on our website.

Additionally, APCO International thanks all telecommunications personnel in the public safety community for their continued efforts to preserve the public's safety. Although APCO International does all it can to honor call takers, dispatchers and other public safety answering points professionals throughout the year, National Public Safety Telecommunications Week (April 8-14, 2012) has been set aside so everyone can be made more aware of their hard work and dedication, which provide a vital link to the public safety services on which we have come to rely every day.

We encourage all public-safety telecommunications professionals to celebrate and honor themselves, their co-workers, bosses, and employees during this special week by hosting a party, reaching out to local media and public officials, or launching an awards program – anything they can to recognize the lifesaving work they perform every day on behalf of the public. Please visit APCO's [PSConnect blog](#) for many ideas how to make this a memorable endeavor.

9-1-1 Facts

(www.nena.org)

As of December 2015, the United States has 5,899 primary and secondary PSAPs and 3,135 counties, which include parishes, independent cities, boroughs and Census areas. Based on NENA's preliminary assessment of the most recent FCC quarterly filings:

- 99.1% of PSAPs have some Phase I
- 96.4% of PSAPs have some Phase II

- 97.1% of Counties have some Phase I
- 95.9% of Counties have some Phase II

- 98.8% of Population have some Phase I
- 98.5% of Population have some Phase II

The term `some' means that some or all wireless carriers have implemented either Phase I or Phase II service in the County or the PSAPs. In order for any carrier to provide service, the County or PSAP must be capable of receiving the service. In most cases, all carriers are implemented in a County or PSAP, but one or more may be in the process of completing the implementation.

9-1-1 Call Volume: An estimated 240 million calls are made to 9-1-1 in the U.S. each year. According to the FCC, nearly 80% are wireless calls; in many communities, it's one-half or more of all 9-1-1 calls.

Basic 9-1-1: Basic 9-1-1 means that when the three-digit number is dialed, a call taker/dispatcher in the local public safety answering point (PSAP), or 9-1-1 call center, answers the call. The emergency and its location are communicated by voice (or TTY) between the caller and the call taker.

Enhanced 9-1-1: In areas serviced by enhanced 9-1-1, the call is selectively routed to the proper PSAP for the caller's location, and the PSAP has equipment and database information that display the caller's phone number and address to the call taker. 93% of counties with 9-1-1 coverage have enhanced 9-1-1 for callers. The term "enhanced 9-1-1" is not synonymous with wireless 9-1-1.

Wireless Phase I: When Phase I has been implemented, the call taker automatically receives the wireless phone number. This is important in the event the wireless phone

call is dropped, and may allow PSAP employees to work with the wireless company to identify the wireless subscriber. Phase I also delivers the location of the cell tower handling the call. The call is routed to a PSAP based on cell site/sector information.

Wireless Phase II: Phase II allows call takers to receive both the caller's wireless phone number and their location information. The call is routed to a PSAP either based on cell site/sector information or on caller location information.

9-1-1 Calls through VoIP: Business and residential use of Voice over Internet Protocol (VoIP) telecommunications services is growing at a rapid pace. Methods to bring 9-1-1 calls into E9-1-1 systems have recently become available, and NENA is leading work to develop full E9-1-1 capability for VoIP-based services.

Next Generation Trends: Estimates are that over 88% of U.S. households have a wireless phone, and 53% of mobile consumers have a smartphone as their primary device. (CTIA – Facts About the Wireless Industry – May 2013)

National 9-1-1 Education

Coalition Partners

APCO International

The Association of Public-Safety Communications Officials (APCO) International is the world's oldest and largest professional organization dedicated to the enhancement of public safety communications. APCO International serves the professional needs of its 15,000 members worldwide by creating a platform for setting professional standards, addressing professional issues and providing education, products and services for people who manage, operate, maintain and supply the communications systems used by police, fire and emergency medical dispatch agencies. Find out more at www.apcointl.org.

CTIA®

CTIA® is an international organization representing the wireless communications industry. Membership in the association includes wireless carriers and their supplies, as well as providers and manufacturers of wireless data services and products. CTIA advocates on behalf of its members at all levels of government. The association also coordinates the industry's voluntary best practices and initiatives, and sponsors the industry's leading wireless tradeshow. CTIA was founded in 1984 and is based in Washington, DC. For more information, visit: www.ctia.org.

iCERT

The Industry Council for Emergency Response Technologies (iCERT) represents the voice of the commercial sector in the emergency communications field. Established by a group of prominent leaders in December 2005 originally as the 9-1-1 Industry Alliance, iCERT - the Industry Council - plays an important role as the voice of companies on public policy issues impacting 9-1-1 and the

emergency response system. Industry Council members believe that business leaders' expertise can assist public policymakers and government emergency communications professionals as they address complex choices regarding advanced communications technology alternatives in the years ahead. Through advocacy, research and in coordination with the public sector, the Industry Council plays a vital role in the development and deployment of emergency response technologies. Find out more at www.theindustrycouncil.org.

The NG9-1-1 Institute

The NG9-1-1 Institute is a non-profit organization, which shares the mission of the Congressional NextGen 9-1-1 Caucus to assist in promoting public education on NG9-1-1 and emergency communications issues. The NG9-1-1 Institute provides informational support to members of the Congressional NextGen 9-1-1 Caucus as they pursue their mission of improving 9-1-1 emergency communications. Find out more at www.ng911institute.org.

NASNA

The purpose of NASNA (National Association of State 911 Administrators) is to promote information sharing amongst those states with programs dedicated to implementing 9-1-1 emergency telephone systems; assist other states with resolving issues necessary to accomplish statewide implementation and maintenance; encourage the establishment of a coordination person within each state or province; identify and recommend minimum standards for 9-1-1 emergency telephone systems; identify and recommend appropriate legislation or rules concerning the administration of statewide 9-1-1 telephone system programs and serve as a knowledge resource for the membership of the Association. Find out more at www.nasna911.org.

NAED

The National Academies of Emergency Dispatch (NAED) is a non-profit standard-setting organization promoting safe and effective emergency dispatch services world-wide. Comprised of three allied Academies for medical, fire and police dispatching, the NAED supports first-responder related research, unified protocol

application, legislation for emergency call center regulation, and strengthening the emergency dispatch community through education, certification, and accreditation. Find out more about NAED at www.emergencydispatch.org.

NENA

The National Emergency Number Association (NENA) serves the public safety community as the only professional organization solely focused on 9-1-1 policy, technology, operations, and education issues. With more than 7,000 members in 48 chapters across the United States and around the globe, NENA promotes the implementation and awareness 9-1-1 and international three-digit emergency communications systems. NENA works with public policy leaders, emergency services and telecommunications industry partners, like-minded public safety associations, and other stakeholder groups to develop and carry out critical programs and initiatives, to facilitate the creation of an IP-based Next Generation 9-1-1 system, and to establish industry leading standards, training, and certifications. Find out more at www.nena.org.

9-1-1 for Kids®

9-1-1 for Kids® is the official public education organization for law enforcement agencies, fire departments, emergency medical response and 9-1-1 communication centers for the U.S., Canada and the Cayman Islands; all countries where "9-1-1" is the universal emergency response phone number. 9-1-1 for Kids® was established in 1994 and is endorsed by: APCO International (Assn. of Public Safety Communications Officials); NG9-1-1 Institute; NENA (National Emergency Numbers Assn.); and NASNA (National Assn. of Nine-one-one Administrators). Find out more about 911 for Kids at www.911forkids.com.

National 911 Program

The mission of the National 911 Program is to provide Federal leadership and coordination in supporting and promoting optimal 911 services. The program achieves its mission with actions designed to increase coordination and collaboration among all 911 stakeholders, operate a clearinghouse providing a variety of information on 911 technology and operations, and administering a

grant program specifically for the benefit of 911 Public Safety Answering Points (PSAPs). Find out more about the National 911 Program at www.911.gov.
